Views

Unique visitors

Cumulative: 310

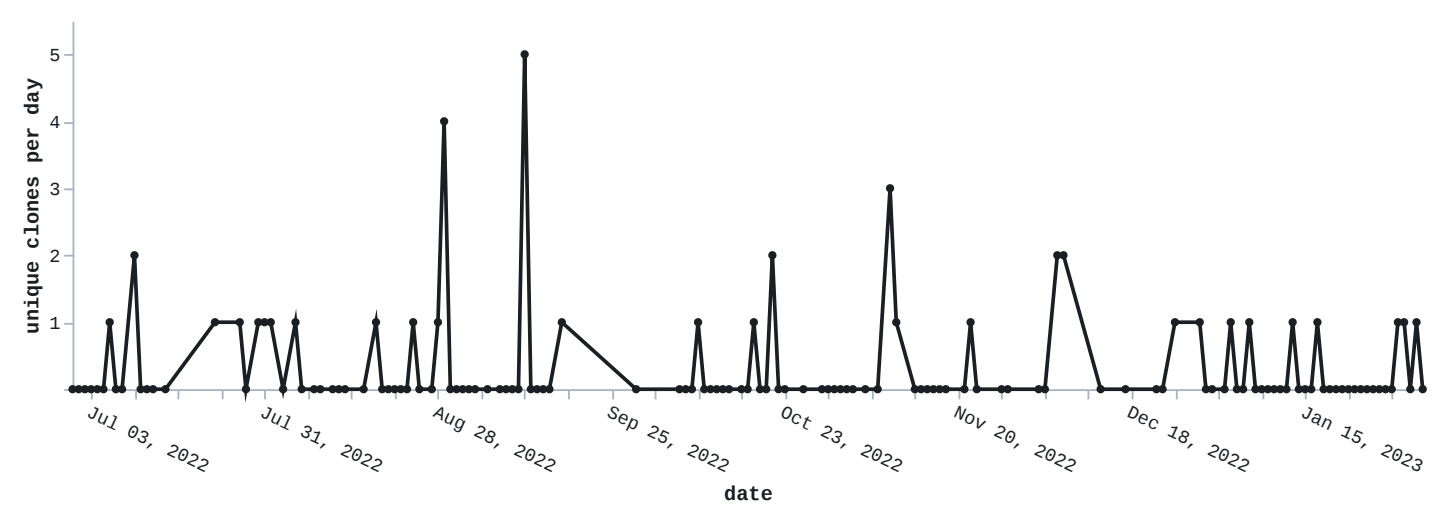

Total views

Cumulative: 3527

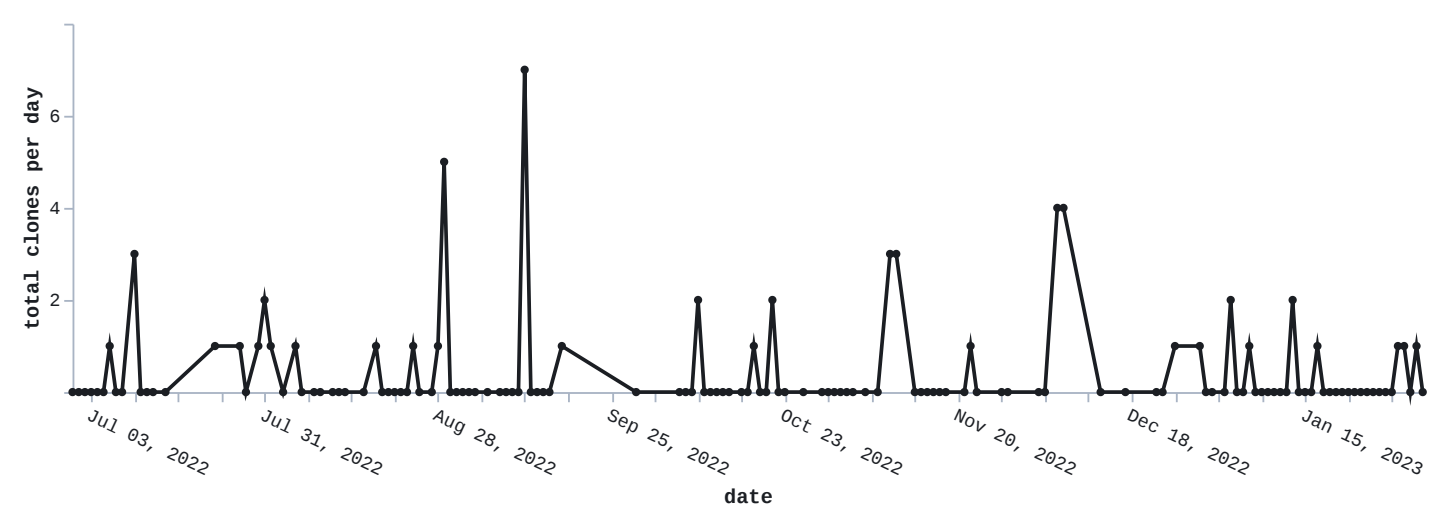

Clones

Unique cloners

Cumulative: 44

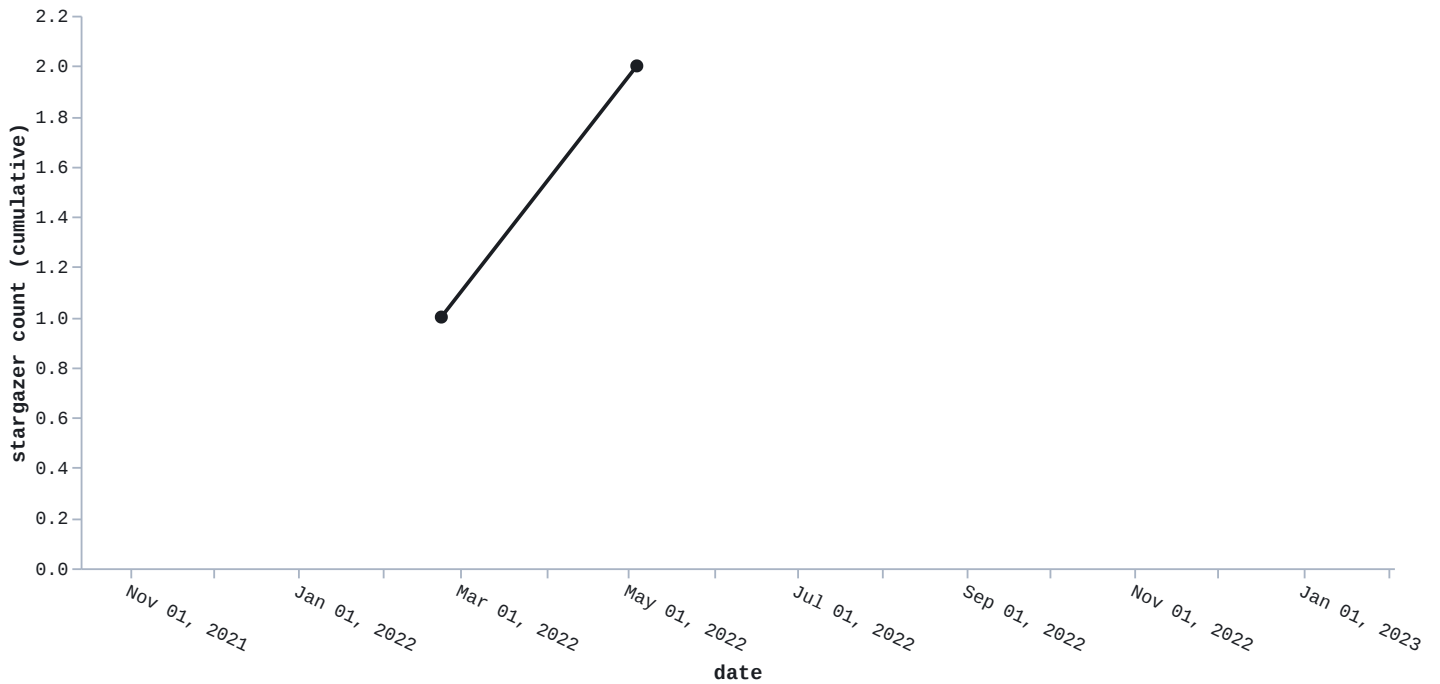

Total clones

Cumulative: 58

Stargazers

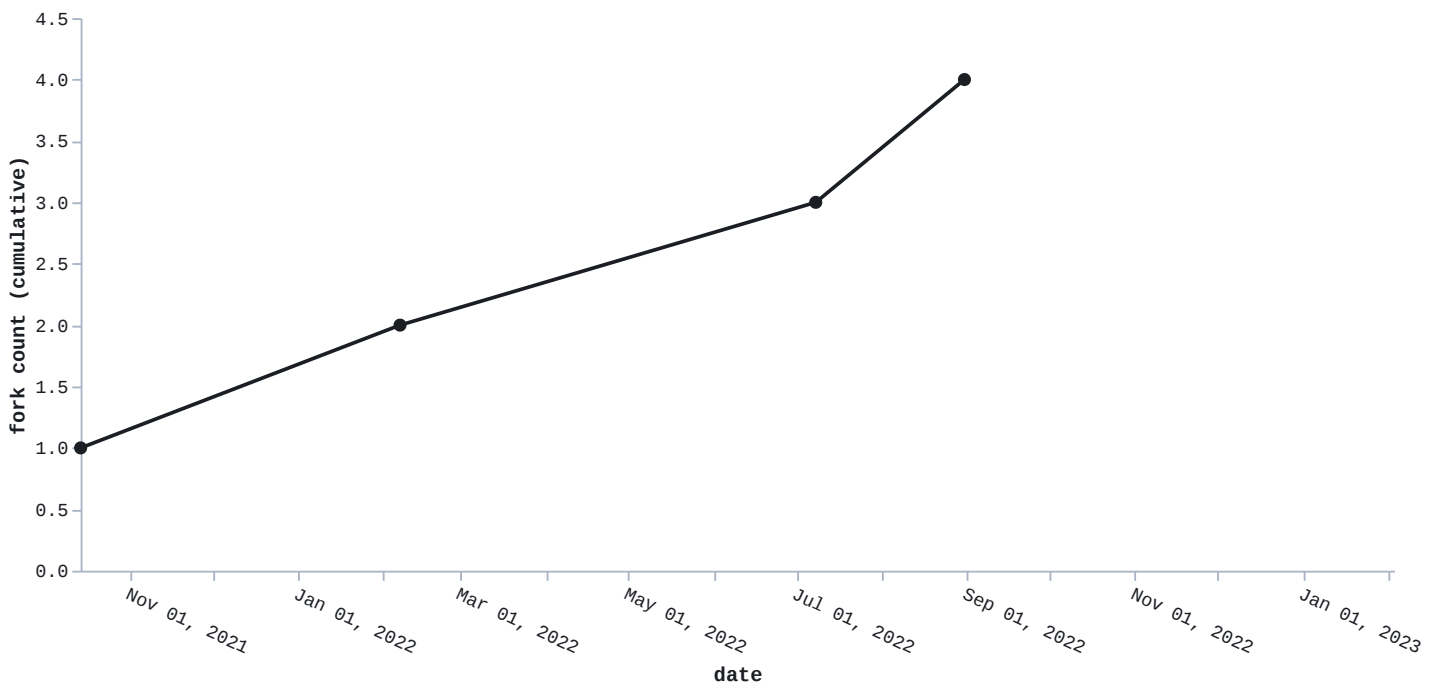

Each data point corresponds to at least one stargazer event. The time resolution is one day.

Note: this plot shows a larger time frame than the view/clone plots above because the star/fork data contains earlier samples.

Forks

Each data point corresponds to at least one fork event. The time resolution is one day.

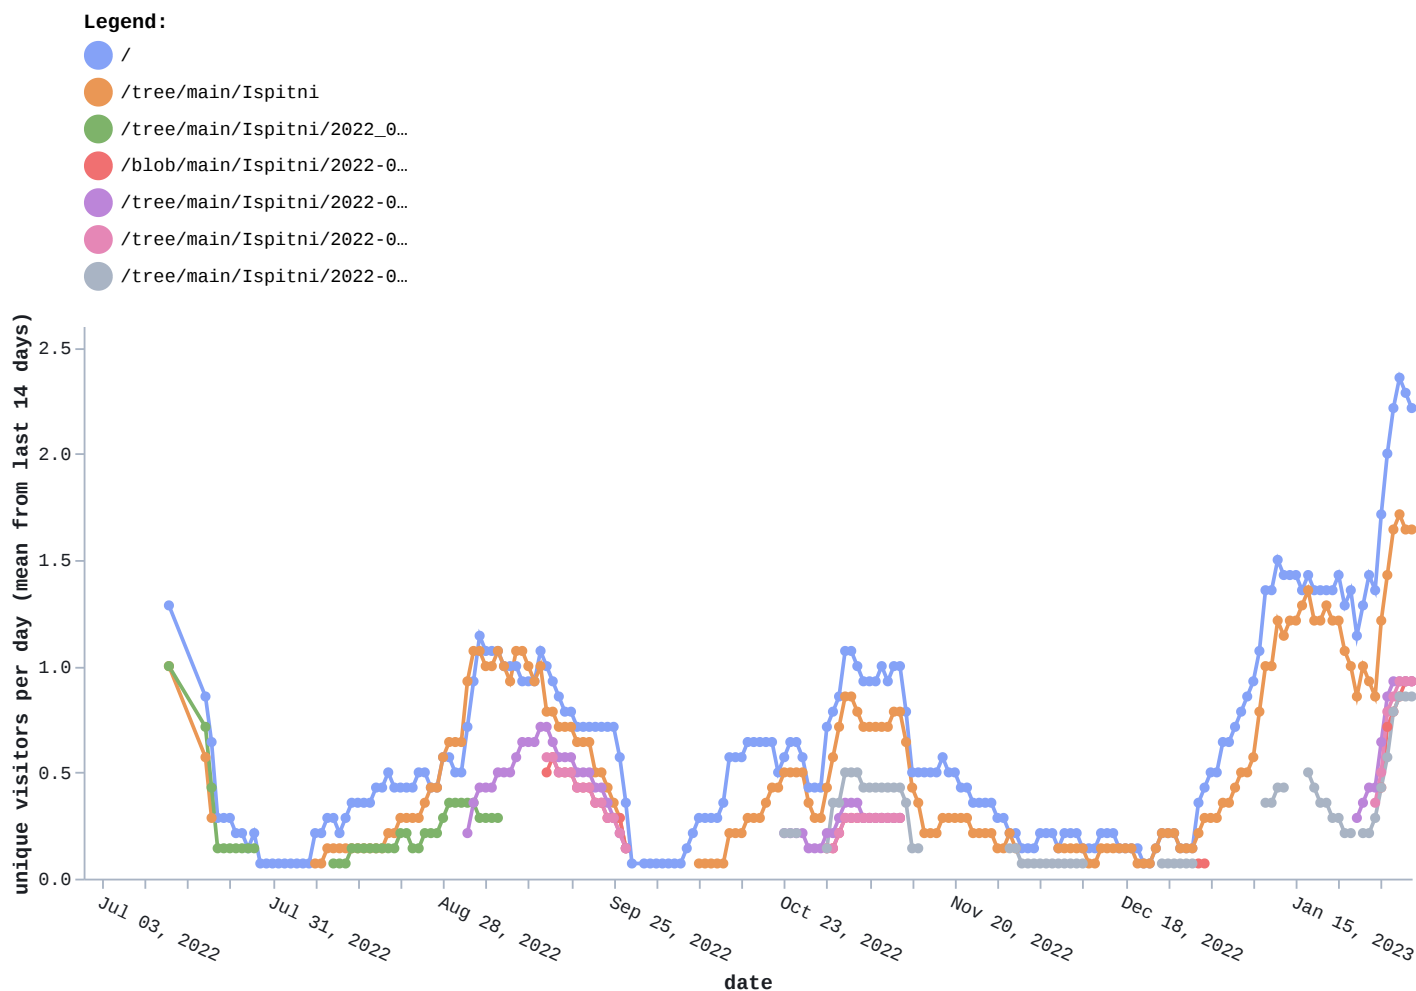

Note: this plot shows a larger time frame than the view/clone plots above because the star/fork data contains earlier samples.

Note: Each data point in the plots shown below is influenced by the 14 days leading up to it. Each data point is the arithmetic mean of the “unique visitors per day” metric, built from a time window of 14 days width, and plotted at the right edge of that very time window. That is, these plots respond slowly to change (narrow peaks are smoothed out).

The chart displays the unique visitors per day (mean from last 14 days) for several domains over time. The y-axis represents the unique visitors per day, ranging from 0.0 to 0.8. The x-axis represents the date, from July 3, 2022, to January 15, 2023. The legend identifies the domains: github.com (blue), Google (orange), Bing (green), l.facebook.com (red), gitzip.org (purple), l.instagram.com (pink), and m.facebook.com (grey). The data shows significant fluctuations, with github.com having the highest initial traffic and Google showing a sharp increase in late January 2023.

Date	github.com	Google	Bing	l.facebook.com	gitzip.org	l.instagram.com	m.facebook.com
